

## About the Site

S64 Games is not run by a team of developers like most other game sites. Yet it is run by a single person named Shawn Noel. He has loved games ever since he was little and started creating them about 5 years ago. Over the years the games have evolved a lot and he now focuses on Higher Quality games other than the quantity of games. That is when S64 Games was born.

Interaction from the fans is a high priority so if you have any suggestions for the site or games you can send them to..

Webmaster@shawn64.com

If you need help with anything you can send an email to..

Support@shawn64.com

If you have any content to submit to the site (ex. wallpaper, game add-ons, and fan art) send an email to..

Submit@shawn64.com

Blow away the competition by competing for the top score on the Online High Score Tables!

You will be playing in no time! A quick and easy download is all you need to be playing one of the best Mini Golf games around!

## **Thrust**

In thrust you try to guide your ship around the levels collecting the pearls and then landing on the finish pad. This is not near as easy as it sounds. Once you get past caves you will run into all kinds of weird gravity tricks and other obsticals to kill you. Oh yeah that's what makes it hard. You touch a wall and you blow up and have to start the level over. That's ok though because there is no limit to lives.

## **Galaxy Arcade 2**

This is a combination of classic and original games made by me. It includes Last Flight, Diver, Snow Boarder, Light Fights, Asteroids and Pacman. These have alot better graphics than the previous Galaxy Arcade. It also has the usuall juke box where you can choose your background music while playing. Half of the games are 2 player for more replay value. Two player Sky Diver is a blast!

## **Missile Wave 3D**

Missile wave is a 3D looking version of Missile Wave 2. A variety of different missiles are coming strait at the screen. You have to click on them to blow them up. You can play stage mode where it starts easy and gets harder as you go. You can also play classic mode where you start with all the missiles and try to get a high score. This game has some great effects.

## **Infection**

Infection is a platform/shooter. You move through stages killing off the life infected by a strange mist let off by an asteroid. It has allitle bit of a metroid style but is much more linear. There isn't really any exploration to do at all. You will pass through 5 levels full of death and monsters. Overall there is about 40 rooms with 2 save points farther in the game so you have to be pretty good to beat it.

## **Bounty Hunter SX**

An asteroids style game where you fly around space collecting minerals to upgrade your ship. There are other ships flying around. You want to upgrade to become the most powerful ship in space. There are a ton of upgrades. About 6 shields, 5 weapons, and a bunch of other little things.

## **Ski-Racer 2**

In Ski-Racer 2 you can choose from one player or two playing and start skiing. In one player you try to rack up a high score by grinding, jumping, and collecting point bonuses. Avoid obsticals like rocks, trees, jumps over trains and the avalanche. In 2 player you can go head to head vs. another player and try to be the last survivor or make it to the finish line first.

## **Jetz Fusion**

This is the newest game in my Jetz Series. If you haven't played the previous ones the goal is to fly around cities and go on missions for people to collect cash. If you complete all the missions in the city a boss comes out and fights you to go on to the next level. This is not an easy thing. You have to keep your destruction meter down while doing them so the cops don't kill you. Or if you just don't want to do the missions you can get the destruction meter up as high as possible and try to stay alive which can be a lot of fun. If you beat the game you can play multiplayer with 5 weapons. In one player there is a total of 9 weapons you can collect along your way. You can also download custom weapons made for this game [here](#)

## **Marblex**

Marblex is a game where you try to guide the marble along paths without falling off the edge. The levels all have new obstacles like jumps, tornados, moving platforms, etc... This takes a lot of patience to beat the game. You only have 5 balls and there are 9 levels. One little mistake and your gonna fall.

## **Bubble Gum**

An old platform game I decided to finish up. I don't really like making levels for platform game so it's pretty short with only 9 levels. One hit takes you back to the start though so it's pretty challenging.

## **Cookie Buster**

This was a game made by Stenners and I. In the normal mode you try to get all the cookies without getting hit by different kinds of enemies. As you progress there becomes more enemies and harder ones. Once cookie is added to each level and every time you get one your speed increases just a tiny bit. You can also choose snake mode where you play a more modern version of the old game snake.

## **Missile Wave 2**

This is a sequel to missile wave from Galaxy Arcade. It has some differences. There are a ton of powerups you can get like the mouse YoYo. This also has some things Missile Wave 3D doesn't have. Powerups make up a big chunk of this game's fun factor. Something you can only get from Missile Wave 2. Download it and check it out.

## **GM Hoops**

This is a basketball shooting game like one you might see at an arcade. You have 3 balls and a timer. You go for a high score and that's about it. It takes some practice to get the throwing down. You have to hold the mouse down on the ball and then let go to throw. If you get around 7 or 8 your a pro ;)

## **Holiday Hunting**

This is a very simple concept. Shoot the objects that move by in the background. You can shoot different christmas stuff like deer, elves, etc... I used alot of scaling and shading to make it look 3d but it's really not. I made this in about 4 days with the deadline being christmas but it looks like i fished a bit early =P. Have fun.

## **Fireworks Maker**

An old program I made to make your own firework by setting a bunch of variables and sounds. It's kinda neat to see once but doesnt really have a reason to keep playing with it once you set all the variables to max etc...

## **Jetz Rampage 2**

Jetz Rampage is a awesome stress reducing game. You fly around cities with your standard machine gun and grenades while doing missions to unlock new cities. The cities are fully interactive with different people doing different things around the city. Everything is destroyable. There are many weapons you can unlock while doing missions or by using cheats.

## **Net Racer**

The first ONLINE game I have made so it is really really simple. It is basically a test of your reflexes because you have to constantly push up and push control to jump over a gap. It only works when you play online against someone. I will try to make more complex online games in the future.

## **Shawn vs Jerred**

A game I made for a 8 year old. It is pretty simple. You move your character back and forth trying to catch the gamecubes, pop and hamburgers while avoiding the poop. Yeah.... It has some pretty good ai if you play one player.

## **Jetz Rampage**

Let me tell you this first. If your gonna download this before you've downloaded Jetz Rampage 2 your crazy because thats way better. But this game is still good. It seemed alot better before I made JR2. This is a sequel for Last Flight in Galaxy Arcade 2.

## **Galaxy Arcade**

This was my first game I've made! It may not be the best.. that's for sure.. but it does have some pretty good games in it. The idea for Missile Wave came from a mini game in this. Some games this has that Galaxy Arcade 2 doesn't have are Missile Wave and Bomber Dude. Bomber Dude is 4 player if you have that many people. Like I said, I know this sucks but it was how I started.
